JAVA FULL STACK DEVELOPER

Java Full Stack Developer at Amazon building scalable web applications and internal automation platforms used by global customer service teams. Strong expertise in Java, REST APIs, AWS, and MVC architecture with proven impact in reducing manual effort, improving operational efficiency, and owning end-to-end product lifecycles in agile environments.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Backend: Spring Boot, JPA/Hibernate, JSP/Servlets, REST APIs, Spring MVC

Frontend: React 18, HTML5, CSS3, jQuery

Database: MySQL

Cloud and tools: AWS S3, Git, GitHub, Maven, Postman, IntelliJ

Practices: CI/CD, OOP, Agile development, Automation, Code Reviews, code refactoring, Debugging

CORE COMPETENCIES

- Strong problem-solving and analytical skills applied to debugging and production issue resolution.
- Effective cross-functional collaboration with technical and non-technical stakeholders.
- Time management and sprint-based delivery in agile development environments.
- Ownership mindset with end-to-end responsibility for features and applications.

EXPERIENCE

AMAZON, India

April 2023 - March 2026

Java Full Stack Developer (Automation Specialist)

- Built and maintained Java web applications and internal automation platforms used by global customer service teams across multiple regions.
- Designed and deployed web applications to automate complex workflows and enable seamless system integration, reducing deployment times by 40% and improving scalability across multiple business units.
- Owned end-to-end feature lifecycle including requirement analysis, design, development, deployment, and post-release production support in agile sprints.
- Performed root cause analysis for production issues and reduced recurring incidents by 30% through code optimization and monitoring improvements.
- Led code reviews and enforced best practices, improving code quality and minimizing defects in production releases.
- Collaborated with cross-functional stakeholders to translate business requirements into scalable technical solutions.
- Optimized SQL queries and backend performance, improving application response time by 25%.

PROJECTS

AI-Powered Interview Preparation Platform | Java Full Stack Developer

- Developed a full-stack AI-powered interview preparation platform using **Java, Spring Boot, React, Tailwind CSS, and MySQL**, enabling users to practice technical interviews across 12+ domains, including Java, Spring Boot, React, DSA, and System Design.
- Designed and implemented scalable **RESTful APIs** with **Spring Boot, Spring Security, JPA/Hibernate, and MySQL**, managing user authentication, interview sessions, question history, and AI-generated feedback.
- Integrated the **Groq AI API** to dynamically generate interview questions, evaluate candidate responses, assign performance scores (1–10), and deliver structured, personalized feedback for continuous skill improvement.
- Built a responsive **React** frontend with **Tailwind CSS**, implementing dashboards, interview workflows, result analytics, progress tracking, session history, and interactive UI components to enhance user experience.
- Implemented an asynchronous interview workflow that automated question generation, response submission, AI evaluation, score aggregation, and final performance grading, improving application scalability and maintainability.
- Applied **MVC architecture, Object-Oriented Programming (OOP)** principles, clean coding practices, exception handling, and modular component design to build a scalable and maintainable full-stack application.
- Utilized **Git, Maven, REST API integration, Agile development methodologies**, debugging, and performance optimization throughout the software development lifecycle (SDLC).

Full Stack Developer, PACT (PERFORMANCE ADHERENCE AND COMPLIANCE TRACKING)

- Developed and deployed a Java-based enterprise web application to automate employee compliance tracking and warning management across APAC, LATAM, and Europe regions.
- Built full-stack functionalities using Java, JSP, SQL, and AWS S3, enabling secure document storage and efficient compliance record management.
- Designed and optimized SQL queries and backend workflows to improve data processing, reporting accuracy, and operational efficiency.
- Collaborated with cross-functional teams throughout the SDLC, including development, testing, deployment, and production support activities.
- Managed the end-to-end execution of two large-scale restructuring tasks, working closely with stakeholders to define priorities, track progress, and achieve business objectives.

EDUCATION

B.Tech in Mechanical Engineering
Bharati Vidyapeeth, Kolhapur
