JAVA DEVELOPER

Java Full Stack Developer at Amazon building scalable web applications and internal automation platforms used by global customer service teams. Strong expertise in Java, REST APIs, AWS, and MVC architecture with proven impact in reducing manual effort, improving operational efficiency, and owning end-to-end product lifecycles in Agile environments.

CORE COMPETENCIES -

Strong problem-solving and analytical skills applied to debugging and production issue resolution. | Effective cross-functional collaboration with technical and non-technical stakeholders. | Time management and sprint-based delivery in Agile development environments. | Ownership mindset with end-to-end responsibility for features and applications.

EXPERIENCE -

Amazon, India, March 2026

Java Full Stack Developer (Automation Specialist),

- Built and maintained Java web applications and internal automation platforms used by global customer service teams across multiple regions.
- Designed and deployed web applications to automate complex workflows and enable seamless system integration, reducing deployment times by 40% and improving scalability across multiple business units.
- Owned end-to-end feature lifecycle including requirement analysis, design, development, deployment, and post-release production support in Agile sprints.
- Performed root cause analysis for production issues and reduced recurring incidents by 30% through code optimization and monitoring improvements.
- Led code reviews and enforced best practices, improving code quality and minimizing defects in production releases.
- Collaborated with cross-functional stakeholders to translate business requirements into scalable technical solutions.
- Optimized SQL queries and backend performance, improving application response time by 25%.

Amazon, India, April 2023

Customer Service Associate,

- Assisted customers with returns, exchanges, and refunds, ensuring seamless transaction experiences while adhering to company policies and SLAs.
- Resolved customer complaints efficiently through effective problem-solving, improving customer satisfaction and retention.
- Handled high-volume inbound and outbound calls, delivering prompt and accurate resolutions while maintaining quality standards.
- Collaborated with internal teams to address complex customer issues, ensuring timely escalation and resolution.
- Maintained detailed records of customer interactions and transactions using internal tools and CRM systems.
- Identified recurring customer issues and contributed to process improvements, reducing resolution time and enhancing service efficiency.
- Demonstrated strong communication and interpersonal skills to handle diverse customer scenarios professionally.

PROJECTS -

PACT (Performance Adherence and Compliance Tracking)

- Developed and deployed a Java-based enterprise web application to automate employee compliance tracking and warning management across APAC, LATAM, and Europe regions.
- Built full-stack functionalities using Java, JSP, SQL, and AWS S3, enabling secure document storage and efficient compliance record management.
- Designed and optimized SQL queries and backend workflows to improve data processing, reporting accuracy, and operational efficiency.
- Collaborated with cross-functional teams throughout the SDLC, including development, testing, deployment, and production support activities.

EDUCATION -

- **B.Tech, Mechanical Engineering**
Bharati Vidyapeeth, Kolhapur

TECHNICAL SKILLS -

- **Languages:** Java Programming, JavaScript, SQL
- **Backend:** Spring Boot, JPA/Hibernate, JSP/Servlets, REST APIs
- **Frontend:** React, HTML, CSS, jQuery
- **Database:** MySQL
- **Cloud and tools:** AWS S3, Git, Maven, Postman
- **Practices:** MVC architecture, Agile development, Automation, Code Reviews, Debugging

ADDITIONAL INFORMATION -

- **Languages:** English (Professional), Hindi (Fluent), Marathi (Native)
- **Availability:** Available to join immediately
